EDUCATION

UNIVERSITY OF AKRON

BBA in Information Systems | Minor: Computer Science
Artificial Intelligence and Machine Learning – Undergraduate Certificate

Akron, OH
Expected: Dec 2026

WORK EXPERIENCE

AI ENGINEERING CO-OP

Peak Nano

Macedonia, OH
Sept 2026 - Present

- Building AI and ML infrastructure for internal automation initiatives.

AGENTIC DATA ANALYST INTERN

Seagate Technology

Remote
Jun 2026 - Sept 2026

- Owned the weekly Customer and Product Master change review for RevOps, replacing a multi-workbook Excel process with a Power BI dashboard run in Monday reviews across 140,000+ records.
- Cut the weekly review queue 38% on customer records and 70% on product records by classifying changes on business priority, removing 10,000+ irrelevant rows.
- Automated the weekly missing-PO escalation across 6 levels, matching manual output on all 150+ records with zero quantity variance.
- Quarantined 25% of incoming data loads before reporting and cut AI raw-data access from 16,000+ rows to zero, returning 100% of validation failures through read-only views.

PRODUCT MANAGEMENT CO-OP

Schaeffler

Strongsville, OH
Jan 2026 – May 2026

- Expanded competitive coverage from 25 to 32 U.S./Canada performance clutch manufacturers, correcting scope errors in 20% of the initial list.
- Built competitor pricing coverage from zero to 50+ SKUs, establishing the pricing-tier axis used to position all 32 manufacturers.
- Delivered a 10-slide competitive landscape analysis to PM leadership and the Strongsville VP, identifying 4 market gaps.
- Raised average ACES/PIES spec completeness from 0% to ~53% across 30 SKUs in Schaeffler's PIM, reaching full coverage where source data existed.

IT INTERN

MFS Supply

Solon, OH
May 2025 – Aug 2025

- Built a NetSuite calendar in JavaScript that let installers reschedule jobs by dragging on a tablet, replacing a four-step office lookup and edit across 1,000+ purchase orders.
- Resolved 100+ IT tickets monthly while supporting 250+ employees across hardware and software.

RESEARCH

AI RESEARCH FELLOW

AlgoVerse

Remote
Jun 2026 - Present

- Conducting LLM safety research on audit budget allocation under adversarial conditions, targeting peer-reviewed publication.
- Built the dataset normalization and scoring pipeline the team's analysis runs on, deploying a self-hosted 27B model.

UNDERGRADUATE RESEARCH ASSISTANT – COMPUTER VISION

The University of Akron

Akron, OH
Jan 2026 – Present

- Benchmarking YOLO, RT-DETR, and EfficientDet on custom weapon detection datasets, authoring findings as first author under faculty supervision.

TECHNICAL SKILLS

Programming Languages: Python, C++, JavaScript, SQL (MySQL, SQLite, Oracle)

ML & AI: PyTorch, TensorFlow, Scikit-learn, HuggingFace, LlamaIndex, FAISS, Ultralytics (YOLO/RT-DETR), vLLM, MCP

Tools: Git/GitHub, Docker, PostgreSQL/pgvector, Power BI, Tableau, Alteryx, JMP
